GENERAL VIEW OF INSTRUCTION.

The University embraces six Departments:

I. THE COLLEGIATE DEPARTMENT,

Including the Classical and Scientific Courses, each requiring four years for its completion.

The Course in Arts, leading to the degree of Bachelor of Arts, includes the Greek and Latin Languages. During the first and second years Latin and Greek are required each five times a week. During the third year Latin and Greek are required one term, and in the fourth year Greek is required one term. Latin and Greek Prose Composition are required twice a week during the first year.

The Course in Science, leading to the degree of Bachelor of Science, is characterized by the absence of Greek and the prominence given to Physical Sciences and Modern Languages. Latin and German are required each five times a week during the first year. During the second year French or German is required five times a week, and during the third year, Physics the same.

Candidates for admission to either of these Courses are required to pass an examination in the studies of the Preparatory Course or their equivalents. Applicants are required to present testimonials of good moral character, and if from another Institution, a certificate of regular dismission.

II. THE PREPARATORY DEPARTMENT

Extends through two years and includes the Classical and Scientific Courses, leading to the corresponding Courses in the Collegiate Department. In the Classical Course Latin is required five times a week the first year, and Greek and Latin during the second year. Latin Prose Composition is required twice a week during two terms of the second year. In the Scientific Course, Latin is required only during the second year. A knowledge of the common English branches is required for admission to either of these Courses. Candidates are urged to apply themselves carefully to the requisite studies: Orthography, Reading, Elementary Grammar, Arithmetic and Geography.

III. THE ENGLISH DEPARTMENT

Is established with a view to the needs of young people who are deficient in the preliminary English branches. The Course includes the branches taught in the Common Schools: Reading, Grammar, Geography, Arithmetic, Physiology, United States History and Penmanship.

The attention of those who do not wish to take one of the regular Courses is called to the facilities furnished in these Departments of the University, for obtaining a general education. Irregular students are permitted to enter any of the classes providing they are prepared to pursue the study successfully.

Grammar - both Elementary and Advanced; Geography, Reading, History; Arithmetic—both Elementary and Higher; Penmanship and Vocal Music *are taught every term.* Classes are organized in Algebra, Geometry, Physiology and Physics *at the commencement of the first and second terms.* Classes are formed in Latin, Greek, French, German, Chemistry, Zoology and Mental Science, *at the beginning of the year.*

IV. THE COMMERCIAL DEPARTMENT,

Formerly known as "Hurd's National Business College," is now a Department of the University. It is provided with a suite of rooms, on the second floor and the course includes all that is taught in the leading Business Colleges of this country at one-half the expense. The full course requires from three to six months, according to the ability and application of the student. A Partial Course—called Clerk's Course—is organized for those who do not wish to pursue the full Course.

In 1874 a Course in Telegraphy was established in this Department. The apparatus consists of four instruments and one-half mile of line connecting the University with offices in town.

V. THE DEPARMENT OF MUSIC

Includes both Instrumental and Vocal, and affords facilities for obtaining a complete Musical Education. The Department is provided with five instruments—two Pianos and three Organs. Instruction is given in Thorough Bass, Harmony, Composition and Vocal culture.

VI. THE DEPARTMENT OF FINE ARTS

Includes Painting and Drawing, and affords facilities for acquiring a knowledge of the Fine Arts. The studio is open from 2 to 5 p. m., each school day.

ENGLISH DEPARTMENT.

The course of study embraces all the branches taught in the common schools—Reading, Spelling, Writing, Grammar, Arithmetic, Geography, United States History, Physiology and Declamation.

COMMERCIAL DEPARTMENT.

THE PREPARATORY COURSE

Includes a thorough analysis of the nature and uses of the different books kept by business men, Language of Trade and Commercial Definitions.

DIVISION A.

Introduces the student to a miniature business world, in which he leases store, invests capital, engages salesmen, purchases a stock of goods at the Merchants' Emporium, and commences life as a merchant.

DIVISION B.

Continues the business already commenced, introducing exercises in Ruling, Spelling and Business Correspondence, with frequent examinations.

DIVISION C.

New and more intricate transactions are introduced in business, involving a thorough understanding of the rule of journalizing.

Frequent drills in Ledger Headings, Closing of Books, Business Papers, and Penmanship.

JUNIOR.

This Department includes Complete Accounts, Forwarding and Commission, Mercantile Correspondence and Commercial Law.

DIVISION A.

Embraces more advanced transactions in trade, introducing a new form of Double Entry Book-keeping, in which less amount of writing is necessary to give a clear and accurate account of business transactions than in any form of single entry now in use.

DIVISION B.

Here he commences business with Assets and Liabilities of previous set, admitting a partner with additional capital. Introducing transactions in Shipping and Commission, use of Bills of Exchange, Notes, Checks, and Drafts, Account of Sales, together with discounting business with the Bank, and Partnership Sales.

DIVISION C.

Comprises Wholesale and Retail Merchandising, Jobbing, Joint Stock Companies, Discounting Notes with Bank, Equation of Payments, short methods of Addition and Multiplication, Mercantile Correspondence, and Business Forms.

MIDDLE.

This Department contains the most difficult and complicated transactions that can possibly occur in business, testing to the utmost the student's knowledge of the principles of the science.

DIVISION A.

Method of changing books from Single to Double Entry represented with great clearness; Second Method of Compound Companies, and a great variety of interesting and difficult computations introduced.

DIVISION B.

First set of Forwarding and Commission transactions become still more complicated, and illustrate a great variety of entries, rendering the merchant expert in Journalizing; Law or Promissory Notes, Drafts, Bills of Exchange, &c.

DIVISION C.

Comprises a thorough practical review of actual business, including the more intricate problems in Forwarding and Commission, where losses have been sustained by accident in transit, by fire, &c., with examples in Bankruptcy.

SENIOR.

This Department contains the Express, Steamboat, and Railroad Offices; Merchants' Emporium and Banks.

DIVISION A.

This Division is devoted to Express, Railroad, Steamboat, Insurance, Exchange, and Real Estate Business. Through these offices all freight is passed by parties representing various interests in different parts of the country, to others at opposite ends of the lines.

DIVISION B.

This is the Merchants' Emporium, and represents business as conducted in a first-class wholesale establishment in one of the great cities.

DIVISION C.

This contains the College Banks, which are actual Banks of Deposit, Discount and Circulation, having regular subscriptions for Shares of Stock, issued as complete in every appointment as any chartered city institution.

No similar institutions in the country are conducted more in accordance with State and National Laws on Banking than are these. After passing through this Department, if proper attention has been paid during the course, the student sustains an examination, and is awarded a Diploma as Master of Accounts, which assures him, if accompanied with the other qualifications necessary in any vocation of life,—energy and perseverence,—an honorable place in the arena of active life, and eventually, competence.

GENERAL INFORMATION.

LOCATION.

Fayette, the seat of the University, is a town of about twelve hundred inhabitants, situated in Fayette county, Iowa, and is accessible from all parts of Northern Iowa and Southern Minnesota by means of the Davenport and St. Paul, and the Burlington, Cedar Rapids and Minnesota Railways. Midway between the Illinois Central on the south with which the Davenport & St. Paul connects at Delaware, and the Milwaukee & St. Paul on the north with which the Burlington, Cedar Rapids & Minnesoto connects at Postville, is the Dubuque and Pacific Railroad, running from the city of Dubuque to Fort Dodge, and within two and a half miles of the University. This road when completed will be the most direct route from the east and the west. These three roads intersect within four miles of the Univsrsity.

THE BUILDING.

The University building—erected in 1857 by the munificence of Robert Alexander and S. H. Robertson—is constructed of limestone, obtained from the quarries in the immediate vicinity of Fayette. It is a substantial structure one hundred feet long by fifty wide, and three stories high. On the first floor, with the main entrances on the east and west, and another on the south, are the Chapel, Laboratory and a suite of rooms for one of the Professors. On the second floor are Recitation rooms, Commercial rooms, Music rooms, Library, Parlor and Museum. The third story is occupied principally by the Society Halls and the Studio.

The University occupies a commanding eminence in the centre of the town plat, and overlooks as picturesque scenery as is unfolded in the Mississippi Valley.

APPARATUS.

The instruction given in Physics embraces, in both Classical and Scientific Courses, three terms. The University is provided with a complete set of instruments made by Ritchie of Boston, by which the principles of the Science are illustrated. Instruction in Chemistry is given by lectures and experiments in the Laboratory. The University is provided with one of Tolle's Microscopes and a set of Microscopical Apparatus for the use of students in the Natural and Physical Sciences.

Charts—Botanical and Anatomical—Globes, Maps, Orrery, Tellurion, &c., are used in the several departments of the school.

MUSEUM.

The Museum of the University is arranged on the second floor, and contains collections in Geology, Zoology, Mineralogy and Conchology. The

specimens are labeled and arranged for the use of students in these sciences. The University itself is on the Niagara limestone, which is everywhere exposed in bold and picturesque ledges along the Volga River, and which occupies over one-half of Fayette county. Within half a mile of the University this formation affords abundant specimens of corals—Halysites, Heliolites, Favosites and Stromatopora, and is also rich in species of Brachiopods—Orthis, Atrypa, Strophomena, Spirifera, Pentammeri. In Fayette county alone six geological formations are exposed. The students of the University, therefore, have an opportunity of examining from time to time the rock strata, and to collect specimens.

LIBRARY AND READING ROOM.

The Library and Reading Room is placed on the second floor, and is open to all students of the University every school day. Libraries of the three Societies are accessible to the members of the Societies according to regulations established by themselves. These Societies also publish an eight-page monthly paper called "The Triad."

GOVERNMENT.

The University treats its students as ladies and gentlemen. The noblest faculties of the mind and the best affections of the heart are addressed, and a careful supervision exercised over the social manners and habits, as well as the moral feelings of the students. The great object—culture and preparation for the struggles of life—for which students resort to the University is ever kept before them. To secure the accomplishment of this object, a few general rules have been found necessary. These are announced at the commencement of each term.

RELIGIOUS EXERCISES.

The duties of each day are opened with Religious exercises in the chapel of the University, at which all students are required to be present. Besides this, students are required to attend public worship on the Sabbath, in the morning and evening, at one of the churches of the place.

DEGREES CONFERRED BY THE UNIVERSITY.

The University confers the following Degrees in course:

The Degree of Bachelor of Arts on those students who complete the classical course of study.

The Degree of Bachelor of Science on those students who complete the scientific course of study.

The Degrees of Master of Arts and Master of Science, respectively, on Bachelors of Arts and Bachelors of Science, providing that since graduation they have sustained a good moral character and pursued some literary or scientific calling.

Candidates for these degrees should apply to the President of the University two weeks before Commencement. The applications must be accompanied by a fee of five dollars to pay for diploma.

Students who complete the full course of the Commercial Department are awarded a diploma as Master of Accounts.

LADIES' PROFESSORSHIP ASSOCIATION.

Mrs. A. N. Ingham, President; Mrs. A. J. Duncan, Secretary; Miss Abbie Mills, Corresponding Secretary; Mrs. L. S. Strong, Treasurer.

The Ladies' Professorship Association of the University perfected its organization Nov. 28th, 1873, by adopting a constitution and incorporating under the laws of Iowa, thereby becoming a body corporate, having all the powers necessary in order to hold or transfer estate of any kind, to receive bequests or donations, or to enforce collections of moneys loaned.

The object of this Association is to endow a chair, to be known as the "Lady Professorship of the Upper Iowa University," the Professor to be chosen by the joint action of the Association and the Board of Trustees. The first steps toward this organization were taken at the Commencement for 1873, on suggestion of a member of the graduating class, and a considerable donation to the fund was at once pledged.

Since that time the Association has met with gratifying success, and in 1874 elected to the professorship indicated, Miss Eila Torbet, a graduate of Baldwin University.

The amount desired in order to fully endow this chair not having been realized, we desire to present it to the friends of education as in every way worthy of their benefactions.
